

AIR STERILIZATION SYSTEMS

AEROMAXE

INDUCTION AIR STERILIZER

The Aeromaxe Air Sterilizer is a disinfection system that is designed to operate in the presence of human beings unlike most UVC based systems. It makes use of state-of-the-art patented electromagnetic Induction Technology to sterilize air. Its mode of operation completely negates the inefficiencies that lags most of the filter screen based air purifiers. It features a TFT touch screen display panel which can be used to set various disinfection modes for the space.

PRODUCT FEATURES

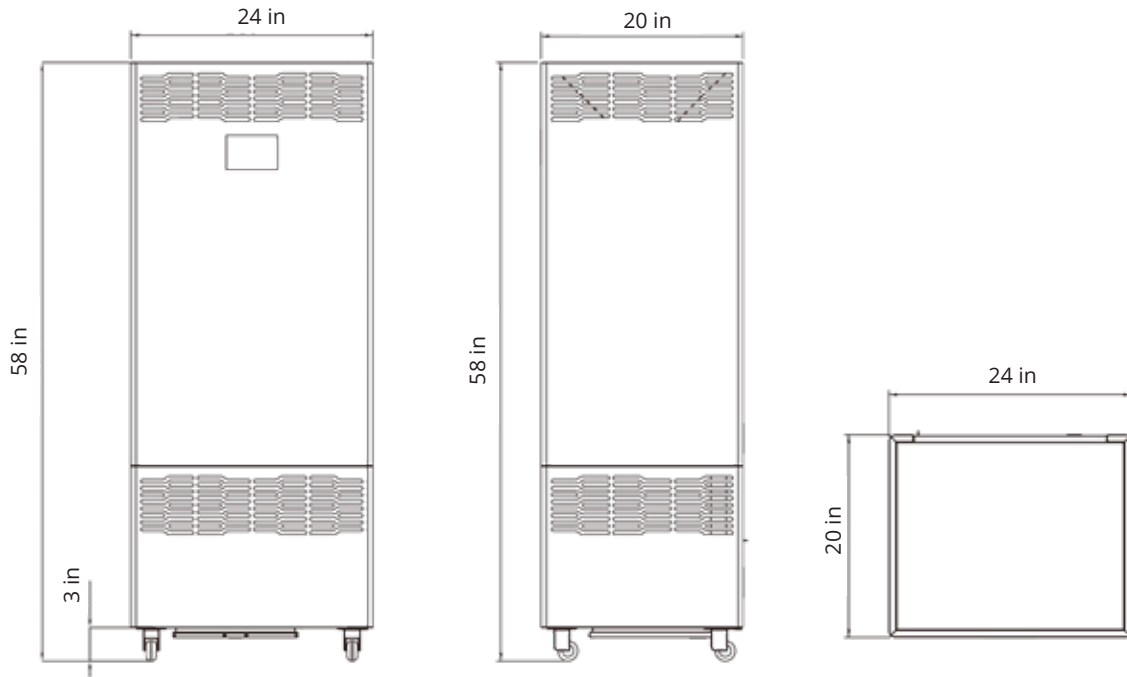

- + Kills most disease causing pathogens like bacteria and viruses.
- + Uses patented Electromagnetic Induction Technology for disinfection.
- + Reduces the risk of irradiation from UV based disinfection systems.
- + More effective than filter screen based air purifiers.
- + Produces zero VOCs as in the case of spray disinfectants.
- + Easy to operate and maintain.

PRODUCT SPECIFICATIONS

PARAMETERS	INDEX
Power	2300 W
Voltage	110 - 220 V, 50/60 Hz
Dimension	24 x 20 x 58 in
Weight	187 lbs
Operating Temperature	5 °F and 113 °F
Air Volume	42370 ft ³ /hr
Effective Operation Area	2000 sqft
Sterilization Efficiency	89.26% in 15 minutes and 99.91% in 30 minutes
Major Function	Running Time Setup, Environment Setup, Running Mode Setup, Warning for Cleaning (Air Sterilization Purifier)
Sterilization Technology	Induction Matrix Air Sterilization Technology
Housing	High Quality Stainless steel
