THE FUTURE OF QUALITY DISINFECTION

STRONG SOCIAL CONNECTIONS

BUILD

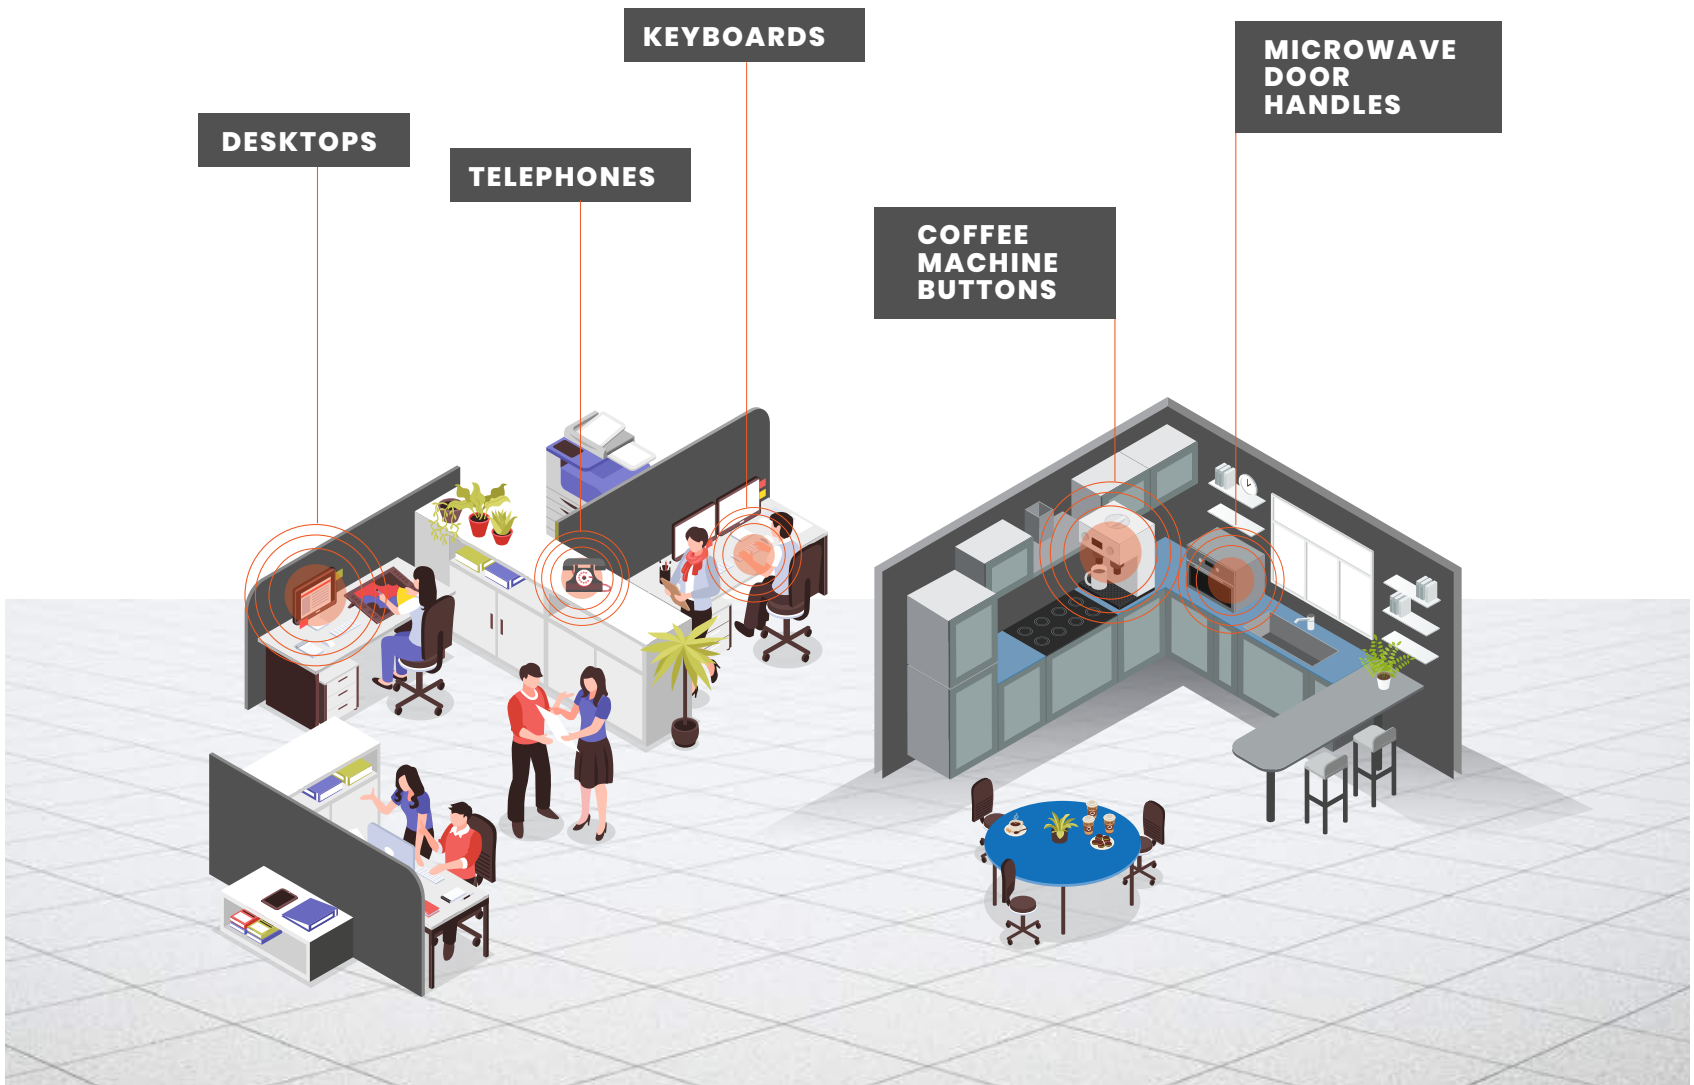

SUCCESSFUL WORKFORCE

Even if the world has accustomed itself to Smart Working, going to office, working at your desk with your team around, getting assembled in the conference room, establishing human contact and having a cup of tea or coffee with your colleagues – is second to none.

While engaging in these activities at workplace, a great deal of cleanliness is required to prevent transmission of disease-causing pathogens. After all, a healthy work environment leads to high levels of productivity.

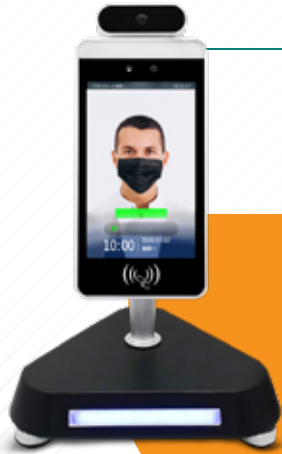

Keeping this in mind, Axenic-UV has developed a diverse portfolio of Disinfection and Temperature Detection Solutions. Studies have shown that contrary to popular belief, toilet seats are not the most germ-laden surfaces in an office.

THESE HIGH-TOUCH POINTS ARE THE MOST CONTAMINATED AND NEED HIGHER ATTENTION!

It is here, our contactless disinfection solutions come into picture as they smartly disinfect all these high-touch points without invading personal workspace. Axenic-UV's range even includes Face-with-mask temperature detection system that gives you freedom from traditional fingerprints and punching methods, instilling a sense of elevated security amongst your staff.

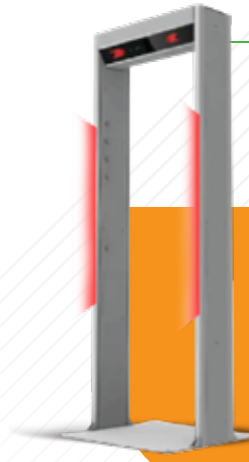

TICK OFF ALL THE POINTS FROM YOUR OFFICE SAFETY CHECKLIST WITH
AXENIC-UV'S 360° DISINFECTION & TEMPERATURE DETECTION SOLUTIONS

TANTUM

8 INCHES ULTRA-THIN
FACE RECOGNITION
THERMOMETER

- Power Consumption
14 W (Max)
- Wavelength
265 - 275 nm

MOBILE UNIT
MICROWAVE
UV STERILIZER

- Power
750, 1000, 1280 W
- Wavelength
265 - 275 nm

AEROMAXE PRO

UPPER ROOM AIR INDIRECT
GERMICIDAL UV FIXTURE

- Power
30 W
- Wavelength
254nm

Axenic-UV is a leading American Disinfection Solutions Provider. The company is backed by the IKIO Group, an LED Lighting Industry leader, which is spearheading innovation in the industry for more than three decades. With this influential support we strive to leverage the advancing possibilities of the latest Germicidal & UV Technologies and lead the industry in eradicating harmful pathogens – ensuring safer surroundings for everyone, everywhere.

With Axenic-UV you can have proven technologies that are absolutely contactless for surface disinfection, air sterilization and elevated temperature detection – all under one roof.
